

**Yellow warning
Snow & Ice**

Between

**00:00 Thu 11 Feb 2021 and
12:00 Fri 12 Feb 2021**

Although not as heavy or frequent as experienced over the past few days, further snow showers could bring disruption to travel in places.

What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Further snow showers are expected to continue to affect parts of northeast England and northern and eastern Scotland. Whilst these are not expected to be as heavy or widespread as earlier in the week, some persistent bands of snow showers may develop in places. Accumulations of 1-3 cm are likely with 5-8 cm possible where more persistent bands of snow develop.

Icy stretches are possible overnight where surfaces are left wet from the partial melt of lying snow during the daytime.

Medium likelihood of low impacts
